ADMISSION
Romanian citizens, citizens from the E.U. member states, the European Economic Area (E.E.A.) and the Swiss Confederation and foreign citizens from non-E.U. states can apply for enrollment in this program.

Minimum requirements:
1. The graduation from an accredited high school in the country of origin, corresponding diploma recognized by the Ministry of Education and Scientific Research of Romania.
2. A certificate of proficiency in English language (at least B1 level, according to EU rules, or equivalent).
The Industrial Design program meets the expressed needs of the textile and leather industry. It establishes educational provision that enables graduates to perform at various disciplinary interfaces, such as design/technology, materials/technology, design/management etc. The program aims to:

- build up the frame for in-depth understanding of the basic design of all type of textile and leather products;
- provide solid training in all textiles and leather domains in relation to product design and development, bringing together traditional methods with modern CAD systems;
- create a multidisciplinary approach, combining fundamental engineering courses with specialty courses;
- develop both professional and transversal skills facilitating employment in a large range of fields.

The students benefit from up-to-date facilities with a special focus on the laboratories with dedicated software for graphic design and the latest versions of CAD systems in knitting and clothing, as well as laboratories for the analysis of textile and leather and production lines for prototyping.
